iConnection does it all!

The team of iConnection is as much hardware as software specialists, enabling us to provide you with a full turnkey solution. We are only too happy to install hardware, set up and configure servers and networks and provide on-going support. Our staff is friendly, our service excellent and our pricing competitive – plus you can receive your whole solution under one roof.

Network Design

Whether you are implementing a new network or upgrading your existing network, our technicians and consultants are able to help you in the important design phase of the project. We will ensure that the overall network design will best suit your needs and budget.

Network Installation

No installation is too small or big for our team. Whether you need cables pulled, or you require complete solutions for a large network environment, iConnection can assist.

Network Maintenance

We will put together a comprehensive package to address those areas in which you may need assistance.

These can include, but are not limited to: software/hardware upgrades, troubleshooting & repair, preventative maintenance, virus protection and security issues.

Network Support

An important part of a productive and cost-effective working environment is the ability to get help when a problem on your network occurs. We offer telephone support, remote support, on-site support as well as dedicated support packages tailored according to your needs.

Server Sales

We can assist in providing you with all server hardware ranging from processors, memory, boards, housings, barebones and server raid controllers to cabinets and accessories.

All complete servers are built to specification and all components can be installed by our technical team

Server Installations, Configurations & Support

We can install, configure and support various applications on your Linux / Windows server, including: Proxy servers, Mail Servers, Firewalls, FTP Servers, DNS Servers, IPCOP and much more.

Guaranteed Support delivered cost effectively
